

LYNN VENESSA
SCCI/01141/2018
FOR: DINNER DICE
PROJECT SCOPE
September 16,2022.

OVERVIEW.

1. Project background and Description.

DINNER DICE is a proposed mobile application that gets nearby and randomly suggests restaurants.It will help to easily identify hotels around you.

2. Project scope.

The project will include:

- Integration of google places API.
- Random recommendation of a restaurant.
- Navigation to the recommended restaurant location.

3. Deliverables.

- Gant chart indicating project timeline.
- Figma UI design.
- Test strategy.
- Functional spec.
- Software.

4. Implementation Plan.

The project will be implemented starting with the implementation of stubs that will guide the development of the UI , after which the UI prototype will be designed. The development of the mobile application will follow and finally testing of the application

5. High-Level Timeline/Schedule.
